| • Tools / Platforms: | Git, GitHub, Android Studio, Spring Tool Suite, Postman, IntelliJ IDEA, VS Code, PyCharm |

Experience

Java Developer Intern | KodBud Technologies

May 2026 – June 2026

- Developed **2 console-based Java applications** (ATM Simulation System & Login Authentication System) applying **OOP principles** — encapsulation, inheritance, polymorphism — for modular, maintainable code.
- Implemented **user authentication and transaction management** handling edge cases (invalid PIN, insufficient balance, session expiry) using **Exception Handling** and control flow logic.
- Applied **Collections Framework** (ArrayList, HashMap) and **File Handling** (FileReader/Writer) to persist session data and transaction history across application runs.

Projects

JobConnect – Java Full Stack Job Portal Platform | *Spring Boot, React.js, REST APIs, JWT, MySQL*

[🔗 Live](#) [🐙 GitHub](#)

- Built a **full-stack job portal** with role-based access (Employer & Applicant) for job posting, application tracking, and profile management; **deployed live on Vercel**.
- Implemented **JWT-based auth & authorization** with role-specific routes and Axios interceptors; integrated **SMTP-based OTP recovery** via JavaMail.
- Designed **RESTful APIs using Spring Boot** to manage job workflows, user data, and application lifecycle; managed data via **MySQL with modular backend architecture**.
- Developed **React.js frontend with Redux and Axios** for data handling; created **fully responsive UI** (mobile + desktop) using Mantine UI and Tailwind CSS.

JobAgent – Android Career Assistant | *Java, Kotlin, Jetpack Compose, MVVM*

[🔗 App](#) [🐙 GitHub](#)

- Developing an **Android career assistant** for resume analysis, ATS scoring, job recommendations, and mock interview preparation with a fully offline pipeline.
- Built a **modular agent pipeline** using regex and keyword extraction for resume parsing and **cosine-similarity scoring** for job-skill matching with weighted skill-gap flagging.
- Implemented a **rule-based recommendation engine** mapping candidate skills to job roles and a **mock interview module** providing feedback via keyword and completeness scoring.
- Designed **responsive UI using Jetpack Compose**; managed reactive state with **MVVM and StateFlow** for clean UI–business logic separation.

Student Management System | *Java, Spring Boot, Hibernate, MySQL*

[🐙 GitHub](#)

- Built a **full-stack Spring Boot application** with **CRUD operations**, persistent MySQL storage, and **MVC architecture** for clean layer separation.
- Designed **RESTful APIs** and integrated **MySQL via Hibernate/JPA**; developed a responsive UI using **Thymeleaf and Bootstrap** with modular service/repository pattern.

Education

Nutan College of Engineering & Research, Talegaon (Dabhade), Pune, India

Expected: 2027

B.Tech in Computer Science and Engineering | *CGPA: 7.61*

Coding Profiles

Solved **500+ DSA problems** on **LeetCode** and **CodeChef**; earned a **1-Star CodeChef** rating with Silver Badge and multiple LeetCode consistency annual badges. [⚡ LeetCode](#) [🍳 CodeChef](#)
